

The WebLog used in this demonstration is available from

<http://almanas.jb.man.ac.uk/alma/Web/Meetings/2021/VirtualWorkshop/weblog-example.tgz>

However, participants are welcome to bring WebLogs from their own projects.

A large satellite dish antenna structure is shown against a dark blue sky. The dish is composed of a complex metal lattice of beams and supports, with a large, curved, perforated metal surface. The structure is illuminated from the side, creating strong highlights and deep shadows. The background is a clear, dark blue sky.

Unfortunately, because of security features in many browsers, it may be necessary to adjust the browser settings so as to view the WebLog properly.

For this demonstration, Firefox is recommended for viewing the WebLog files because its security settings can be adjusted relatively easily.

In Firefox, type “about:config” in the address bar. (This may display a warning page, but click continue to exit the page.)

The screenshot shows the Mozilla Firefox browser window at the about:config page. The address bar contains "about:config" and the search bar contains "privacy.file_unique_origin". The main content area displays a table of preferences.

Preference Name	Status	Type	Value
accessibility.AOM.enabled	default	boolean	false
accessibility.accesskeycausesactivation	default	boolean	true
accessibility.blockautorefresh	default	boolean	false
accessibility.browsewithcaret	default	boolean	false
accessibility.browsewithcaret_shortcut.enabled	default	boolean	true
accessibility.force_disabled	default	integer	0
accessibility.ipc_architecture.enabled	default	boolean	true
accessibility.loadedInLastSession	default	boolean	false
accessibility.mouse_focuses_formcontrol	default	boolean	false
accessibility.tabfocus	default	integer	7
accessibility.tabfocus_applies_to_xul	default	boolean	false
accessibility.typeaheadfind	default	boolean	false
accessibility.typeaheadfind.autostart	default	boolean	true
accessibility.typeaheadfind.casesensitive	default	integer	0
accessibility.typeaheadfind.enableSound	default	boolean	true
accessibility.typeaheadfind.enabletimeout	default	boolean	true
accessibility.typeaheadfind.flashBar	user set	integer	0
accessibility.typeaheadfind.linkonly	default	boolean	false
accessibility.typeaheadfind.matchesCountLimit	default	integer	1000
accessibility.typeaheadfind.preFillWithSelection	default	boolean	true
accessibility.typeaheadfind.soundURL	default	string	beep
accessibility.typeaheadfind.startLinkOnly	default	boolean	false
accessibility.typeaheadfind.timeout	default	integer	5000
accessibility.usebrailledisplay	default	string	
accessibility.usetexttospeech	default	string	
accessibility.warn_on_browsewithcaret	default	boolean	true
advanced.mailftp	default	boolean	false
alerts.disableSlidingEffect	default	boolean	false
alerts.showFavicons	default	boolean	false
app.feedback.baseURL	default	string	https://input.mozilla.org/%LOCALE%/feedback/%APP%/%VERSION%/

On this page, search for the “privacy.file_unique_origin” preference and set it to False. After this, restart Firefox for the fix to take effect.

The screenshot shows the Mozilla Firefox browser window at the `about:config` page. The search bar at the top contains the text `privacy.file_unique_origin`. Below the search bar, a table lists various preferences. The preference `accessibility.typeaheadfind.flashBar` is highlighted in bold, indicating it is the selected item. Its status is `user set`, its type is `integer`, and its value is `0`.

Preference Name	Status	Type	Value
<code>accessibility.AOM.enabled</code>	default	boolean	false
<code>accessibility.accesskeycausesactivation</code>	default	boolean	true
